Initial orbital data of artificial satellites and space probes launched during 1961-62

- 75

Zadunaisky Pedro E.

The orbit of satellite 1958 Alpha /Explorer I/ during the first 10500 revolutions.

SAO Spec.Rept. 1960 Nr 50 30

- 76

Zadunaisky P.E.

Relative positions of the sun and perigee of an artificial earth satellites.

SAO Spec.Rept 1960 Nr 40R 24

- 77

Zadunaisky P.E., Miller B.

Elements of the orbit of the Satellite 1959 Eta /Vanguard III/ during the first year after launching.

SAO Spec.Rept 1961 Nr 71

20

RESULTS OF OBSERVATIONS

- 1

Adams R.M., McCumber N., Brinkman M.

Processed observational data for USSR satellites
1957 Alpha and 1957 Beta.

Smiths.Contrib.Astroph. 1958 2 Nr 10 287-342

- 2

x x x

Approximate positions of artificial satellites ob-
tained with the Baker-Nunn Schmidt camera.

Tokyo Astr.Obs. 1959 June.

List of observations performed with the Baker-
Nunn camera, concerning satellites: Alpha, 1958
Delta 1, 1958 Delta 2, 1958 Delta 3, 1958 Epsilon
- within the period: 5.4. - 16.12.1958.

- 3

x x x

Approximate positions of artificial satellites
obtained with the Baker-Nunn Schmidt Camera /2/

Tokyo Astr.Bull. 1960 Nr 127 1535-1553.

Results of observations carried out with the Ba-
ker-Nunn camera, concerning satellites: 1958 Al-
pha, 1958 Beta 2, 1958 Delta 2, 1958 Epsilon, 1958
Xi, 1958 Alpha 1 and 1959 Alpha 2.

- 4

x x x

Approximate positions of artificial satellites
obtained with the Baker-Nunn Schmidt Camera /3/

Tokyo Astr.Bull. 1960 Nr 130 1621-1643.

Observations of satellites: 1958 Alpha, 1958 Be-
ta 1, 1958 Beta 2, 1958 Delta 2, 1958 Epsilon,
1959 Alpha 1, 1959 Alpha 2.

- 5

x x x

Approximate positions of artificial satellites ob-
tained with the Baker-Nunn Schmidt camera.

Skizzierung einer Methode zur Bestimmung des Schwerefeldes der Erde aus Satellitenbeobachtungen.

Gerlands Beitr.Geophys. 1963 72 Nr 5 277-286

For the solution of the problem of the determination of the earth's gravity field from satellite observations, usually spherical harmonics are introduced. To avoid certain difficulties related with this method, the determination of the mean gravity values, which belong to a convenient square division of the earth's surface, seems to be preferable.

Nowe metody i wyniki badania figury Ziemi.

Biul. Pol. Obs. Szt. Sat. 1963 Nr 7 25-42

The article outlines the principles of the Earth's figure determination by astro-geodetic and gravimetric methods. The results of the researches for the Earth's figure parameters by the method of satellite observations have been discussed and the numerical effects have been given. The formulae have been derived and the calculation has been done in order to investigate the influence of the third spherical harmonics presence on the result of determination of the ellipsoidal flattening from the arc measurement.
